

Gabriel Duete

Mid-Level Frontend Developer | Open Source Contributor

gabrielmonteiroduete@gmail.com | linkedin.com/in/gabrielduete | github.com/gabrielduete | gabrielduete.com

PROFESSIONAL SUMMARY

Frontend Software Engineer with **over 4 years of experience** creating modern web solutions. Specialist in **React/Next.js and Vue/Nuxt.js ecosystems**, with experience developing **e-commerce platforms, marketplaces, and open-source design systems**. Proven track record in **performance optimization**, reducing build/deploy time by **80%**, and in **frontend security**, eliminating 100% of critical vulnerabilities in applications. Active contributor to the open-source community with participation in projects like **Nuxt.js and Unleash**, as well as technical author on platforms such as DEV.TO, TabNew, Stack Overflow, and personal blog.

TECHNICAL SKILLS

AI & Data: LLM Integration (Claude, Cursor, GitHub Copilot, OpenAI), RAG (Retrieval-Augmented Generation), Semantic Search.

Languages & Frameworks: React, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, Jest, Vitest, Web Components, Stencil, CSS Pre-processors / Frameworks (Tailwind, SASS, Styled-components, Chakra UI, Ionic, etc.), Go (Golang), Python.

DevOps & Tools: CI/CD (Azure Pipelines, GitHub Actions), SonarQube, Sentry, AWS (S3, Amplify, CloudFront), Algolia, Unleash, i18n (Internationalization), Microsoft Clarity, Codecov, Git.

Practices & Security: Frontend Security (XSS, Cookies/Cache, etc.), Accessibility, SEO, ADRs, Agile Methodologies, Technical Documentation.

PROFESSIONAL EXPERIENCE

Juntos Somos Mais

Dec 2021 - Present (4 years 4 months)

Software Engineer

- **Optimized the CI/CD pipeline** through parallelization of tests and code analysis (Sonar), reducing delivery time from **1 hour to ~12 minutes (80% reduction)**.
- **Contributed to Unleash (JS SDK)** with a [Pull Request](#), improving the library and collaborating with the project core. The change was made to provide benefits in our use of Unleash in our applications.
- **Contributed to Nuxt.js** by [reporting and documenting an issue](#), assisting in identifying a problem in the build of version 3.16.0+ and in discussing the solution.
- **Resolved an XSS issue in a web-component**, preventing HTML Injection from being applied through component fields.
- Worked on the **development of the Atomium Design System (Open Source)**, generating a **40% reduction in creation time** for new features.
- **Resolved a security issue in application redirection**, preventing user cookies/cache from being compromised by external links. Reducing expenses with bug bounty teams.
- Restructured the frontend team's technical documentation process, centralizing **ADRs** and guiding architectural decisions through POCs.
- Worked on reducing technical debt through refactoring, optimizations, security fixes, and **performance improvements, such as chunk error handling and image and video performance optimization**.
- Developed critical features for the **e-commerce and marketplace platform**, focusing on increasing conversion and customer satisfaction.
- **Implemented complex security rules** and documented causes and analyses of technical problems for the team.
- **Collaboration with product, UI/UX, and engineering** to align technical solutions with business objectives.
- Participated in **meetings and events** focused on front-end and other comprehensive topics, having contact with professionals who drive my technical and interpersonal development.

EDUCATION & LANGUAGES

Information Systems | IFCE Campus Crato

2019 - Paused

Languages: English (Intermediate), Portuguese (Native).
